

3D AREOLA

"Our advanced 3d areola pigmentation training will help you gain extensive knowledge with hands-on experience. Women and men have their confidence restored when their areola looks as if it has been restored to the natural state it once was.

We use this technique to help those who have undergone mastectomies due to breast cancer or other breast surgeries. Irregular shape, fading areolas or simply defining the colour more. You would be surprised at the number of people who simply want a deeper shade of colour.

This is an advanced course for technicians who are certified and have experience in Cosmetic Semi Permanent makeup.

This course teaches advanced mapping of areolas.

This is a hands-on course and does not reflect to beginner theory.

Step by step instructions

Visual aids and practical experience covering Eyebrows Lips and Eyeliner for beginner tattooing.

Choose to utilise unlimited training experience on models and discover more advanced techniques as you keep learning with no additional fees.
